

INTEGRAL

Corporate Social Responsibility

Integral works hard to take into account the economic, social and environmental impact of its activities on customers, employees, the community and the environment in every aspect of its operations.

This consideration extends beyond the statutory obligation to comply with legislation as Integral applies sustainable development and environmentally friendly policies throughout its business.

Whether it involves recycling materials, sourcing supplies from renewable or sustainable sources or advising on energy management to reduce carbon emissions, waste and pollution - Integral has the skills and the services to help its customers meet their sustainable objectives with innovative and cost-effective solutions.

Integral has taken the industry leading step of appointing a dedicated Corporate Social Responsibility (CSR) resource at Director level; Lee Jones provides energy and environmental consultancy services for clients and advises on key CSR issues.

Integral undertakes a range of CSR activities tailored to the needs of the local communities surrounding its 15 regional offices. Lee is working to develop these initiatives and to apply a coordinated strategy across Integral's national network and workforce of more than 2,500 employees.
